Dear Federal Trade Commission Representative,
I am a subscriber to XM satellite radio and I am glad to pay a monthly fee to get the variety of commercial free music channels, the NASCAR channel, Fox News channels, and the instant Detroit Traffic and weather information. The availability to get instant Detroit traffic and weather is important to me. This allows me to get a quick update on the driving situation in this town quickly and without a bunch of commercials. This is not available anywhere else on my AM or FM radio locally. Also, the ability to listen to these channels uninterrupted while I travel out of the Detroit region for business or pleasure is also very important to me and not available in the public airwaves. I do not think that the National Association of Broadcaster should be able to dictate what I listen to or am willing to pay to receive the kind of music, news, sports, weather, traffic channels that are available by XM satellite radio. I recommend that you vote to reject NAB's petition 04-160.

Sincerely yours,

Jeffrey Stukenborg
